| Project Name | Personal Expense Tracker Application |
| Maximum Marks | 2 Marks |

## SOLUTION ARCHITECTURE:

Solution architecture is a complex process – with the many sub-processes- that bridges the gap between business problems and technology solutions.Its goal are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics,behavior and other aspects of the software to project stakeholders.
- Define features ,development phases and solution requirements to the project.
- Provide specifications according to which the solution is defined,managed and delivered to the customers.
